April 25, 1986

B-222819

The Honorable Malcolm Wallop
Chairman, Subcommittee on Public Lands,
Reserved Water and Resource Conservation
Committee on Energy and Natural Resources
United States Senate

Dear Mr. Chairman:

As requested in your January 16, 1986, letter and in subsequent discussions with your office, this fact sheet presents an inventory of the recreational and cultural sites managed by the Bureau of Land Management (BLM), Department of the Interior, as of March 25, 1986. It also presents BLM state and district office budget information for recreational and cultural sites for fiscal years 1985, 1986, and 1987. You also requested that we prepare (1) a listing of federal and state obligations and expenditures from the Land and Water Conservation Fund for 1976 through 1985 and (2) a comparison of the legislative authorities, restrictions, and prohibitions governing recreational fees charged by federal agencies and their related policies. We are reporting the results of our work on these latter two issues in separate products.

To develop the requested information included in this fact sheet, we obtained from BLM's Division of Recreation, Cultural Resources and Wilderness separate listings of its recreational and cultural sites as of February 6 and February 13, 1986, respectively. We verified the accuracy of these listings by telephone contact with recreation and cultural resource specialists in BLM state and/or district offices. During these contacts additional recreational and cultural sites were identified. The listings in sections I and II of this fact sheet were reviewed and agreed to by officials in BLM's Division of Recreation, Cultural Resources and Wilderness and Office of Budget as being accurate and complete as of March 25, 1986.

We attempted to identify the actual costs incurred in fiscal year 1985 and the budget estimates for fiscal years 1986 and 1987 for the various recreational and cultural sites by contacting BLM's Division of Recreation, Cultural Resources and Wilderness and its Office of Budget in Washington, D.C., and various district offices. However, this could not be done because the Office of Budget maintains records that could produce cost data only by each BLM district and the Division of Recreation, Cultural Resources

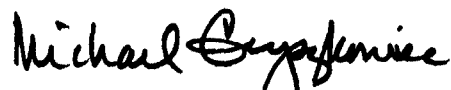

and Wilderness does not maintain budget data. In addition, the district offices do not normally maintain costs by individual sites. As a result, a great deal of time would have been necessary for the district offices to determine the cost data by each site. For these reasons we agreed with your office to present the budget information from BLM's Office of Budget records as it pertains to each district office and not verify the budget information with state and district office records.

BLM classifies its recreational sites as being developed, semideveloped, or undeveloped. As shown in section I, 162 developed, 226 semideveloped, and 1,151 undeveloped recreational sites are located in 50 BLM district offices in 11 states. The management and maintenance costs related to these sites were about \$10.6 million in fiscal year 1985 and are estimated to be about \$11.0 million and \$10.3 million for fiscal years 1986 and 1987, respectively. The developed and semideveloped recreational sites are recorded in BLM records by name and the district where located, while undeveloped recreational sites in each BLM district are recorded by number only because not all of these sites have names.

Unlike recreational sites, the BLM cultural sites are recorded only by state, not by degree of development. As shown in section II, there are 121 cultural sites in 48 BLM district offices in 11 states. The management and maintenance costs related to these sites were about \$4.3 million in fiscal year 1985 and are estimated to be about \$4.8 million and \$4.2 million for fiscal years 1986 and 1987, respectively.

As agreed with your office, unless you publicly announce its contents earlier, we plan no further distribution of this fact sheet until 30 days from its issue date. At that time, we will send copies of this fact sheet to BLM and will make copies available to others on request. Should you need further information, please contact me on 275-7756.

Sincerely yours,

Michael Gryszkowiec
Associate Director

RCED	Resources, Community, and Economic Development Division

BUREAU OF LAND MANAGEMENT'S
RECREATIONAL SITES AND DISTRICT AND STATE OFFICE BUDGET DATA
FOR FISCAL YEARS 1985, 1986, AND 1987

Tables I.1 and I.2 incorporate BLM recreational site listings and budget data by district and state for fiscal years 1985-1987. Among the states Alaska contains just under half of the 341 million acres that BLM administers. Of the remaining 174 million acres, 99.7 percent is in 11 western states: Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. The remaining acreage is scattered in states bordering and east of the Mississippi River; however, it contains no recreational sites.

Table I.1 lists recreational sites by state; classification--developed, semideveloped, and undeveloped; BLM district; and name or number of sites within a district. (Data for both Oregon and Washington are included under Oregon because Oregon's state BLM office is responsible for all the district offices and recreational sites within the two states.) The budget amounts in table I.2--listed by BLM district and state office--cover all site classifications within each office and do not include funding for personnel leave. Fiscal year 1985 data represent actual funding; however, because of future congressional action the amounts for fiscal years 1986 and 1987 are estimates.

BUREAU OF LAND MANAGEMENT'S
CULTURAL SITES AND DISTRICT AND STATE OFFICE BUDGET DATA
FOR FISCAL YEARS 1985, 1986, AND 1987

Tables II.1 and II.2 include BLM cultural site listings and budget data by district and state office for fiscal years 1985-1987. Unlike recreational sites, BLM cultural sites are recorded only by state, not by degree of development. BLM's recreational and cultural resources staff in the headquarters office indicated that potentially 500,000 other cultural sites--such as prehistoric ruins, aboriginal rock art, and historic ghost towns--have not been recorded because (1) they have not been identified or (2) to do so would increase both public awareness of them and the likelihood of looting and vandalism.

Table II.1 lists cultural sites by state, BLM district, and name. (Oregon and Washington state data are listed together because the BLM state office servicing both states is located in Oregon.) The budget information in table II.2 is delineated by BLM district and state office and does not include funding for personnel leave. Fiscal year 1985 data represent actual funding; however, data for fiscal years 1986 and 1987 are estimates pending future congressional budget actions.
