Report to the Ranking Minority Member,
Committee on Commerce, House of
Representatives

November 1998

HAZARDOUS WASTE

Information on Potential Superfund Sites

**United States
General Accounting Office
Washington, D.C. 20548**

**Resources, Community, and
Economic Development Division**

B-281230

November 30, 1998

The Honorable John D. Dingell
Ranking Minority Member
Committee on Commerce
House of Representatives

Dear Mr. Dingell:

The Superfund program is the Environmental Protection Agency's (EPA) effort to clean up hazardous waste sites that threaten human health and the environment. EPA places sites needing long-term cleanups under the program on the National Priorities List, a list of the nation's most seriously contaminated sites. As of August 1998, there were about 1,200 hazardous waste sites on the list. State governors, whose approval EPA seeks for listing, have not concurred with the listing of certain other sites. Furthermore, as of October 8, 1997, EPA's Superfund database listed 3,036 additional sites—including some sites owned by federal agencies—whose risks according to EPA's evaluations are serious enough to make them potentially eligible for the National Priorities List. These sites are classified by EPA as "awaiting a National Priorities List decision." (App. I provides background information on the Superfund program and the National Priorities List.)

You requested that we survey EPA regions, other federal agencies, and the states to determine which of the 3,036 sites are still potentially eligible for the National Priorities List and to obtain, for these sites, information about the nature and extent of the threat they pose to human health and the environment, any cleanup actions that EPA and states may have taken at the sites, and any cleanup plans EPA and states have for them, including possible placement on the National Priorities List. You requested similar information for sites whose placement on the National Priorities List has been blocked by state governors. You also asked that we identify sites classified as awaiting a National Priorities List decision as of October 1997 that are unlikely to become eligible for the list and explain why they are unlikely to become eligible.

This report provides the requested information from our surveys of EPA regions, federal agencies, and states for each of the 3,036 sites awaiting a National Priorities List decision, as well as for sites whose placement on the list has been opposed by state governors. A companion report that we are releasing today, Hazardous Waste: Unaddressed Risks at Many

Potential Superfund Sites (GAO/RCED-99-8, Nov. 30, 1998), provides aggregate information for the potentially eligible sites and our analysis. The companion report is based on the same survey results as this report.

In summary, our surveys of EPA's regions, other federal agencies, and states¹ found the following:

- Of the 3,036 sites that EPA's Superfund database classified as "awaiting a National Priorities List decision" as of October 8, 1997, 1,789 are still potentially eligible for placement on the list. Officials of EPA, other federal agencies, or states reported that about 17 percent of the 1,789 potentially eligible sites currently pose high risks to human health and the environment and that another 10 percent of the sites could pose high risks in the future. These officials were unsure about the severity of the risks for almost 600 of the potentially eligible sites. According to officials, 73 percent of the 1,789 sites have caused contamination in groundwater, and 32 percent have caused drinking water sources to become contaminated. Ninety-six percent of the 1,789 sites are located within a half mile of residences or places of regular employment. Some cleanup actions were reported to have occurred at about 38 percent of the 1,789 sites. However, these cleanup actions have generally been limited in scope, primarily involving removing waste or other steps to mitigate the effects of the contamination but not a full cleanup of the sites.² EPA and state officials were unable to predict whether EPA, under the Superfund program, or the states, under their own cleanup programs, will arrange for cleanup of over half the sites. Appendix II presents for each of the potentially eligible sites, by state, information from our survey on, among other factors, site characteristics, contaminants, and any cleanup activities that have occurred or may occur in the future.
- Collectively, respondents believed that 232³ of the 1,789 sites could be placed on the National Priorities List in the future, although they agreed on the possible listing of only a few sites. EPA officials identified 106 sites that they believed might be placed on the list, state officials identified another

¹In this report, unless otherwise noted, "states" includes the 50 states, the District of Columbia, Guam, Midway Island, the Northern Mariana Islands, Puerto Rico, and the Navajo Nation.

²Of the 1,103 sites for which no cleanup actions were reported, both EPA and the states said that they had taken no cleanup actions beyond initial site assessments at 719. For 336 sites, EPA officials alone said that their agency had taken no cleanup actions, but the states provided no information. California, Massachusetts, and New Jersey account for about 85 percent of these sites. Similarly, for six sites, the states said that they had taken no cleanup actions, but EPA provided no information. Neither EPA nor the states provided information on any cleanup actions that may have occurred at the remaining 42 of the 1,103 sites.

³Eight of the 232 sites are federally owned or operated facilities.

100 sites, and both EPA and state officials agreed that 26 sites might be potential National Priorities List candidates. Appendix III presents for each of the 232 sites information from our surveys on, among other factors, site characteristics, contaminants, and any cleanup activities that have occurred or may occur in the future.

- As of October 15, 1997, state governors had not concurred in the placement of 33 sites in 19 states on the National Priorities List. Many of these sites exhibit the same characteristics as the sites that are awaiting a National Priorities List decision and are still potentially eligible for the list. Many of these sites present significant risks to human health and the environment. For example, according to EPA or state officials, about 79 percent of these sites have caused contamination in groundwater, and about 18 percent of the sites have caused drinking water sources to be contaminated. Ninety-four percent of these sites are located within a half mile of residences or places of regular employment. Some limited cleanup progress has reportedly occurred at about 79 percent of the sites. State officials reported that cleanup has been completed at about 6 percent of these sites, final cleanup activities were under way at about 24 percent, some cleanup actions that may or may not be final were being conducted at about 21 percent, and no cleanup activities had yet been conducted at 45 percent of the sites.⁴ Appendix IV presents information from our surveys on, among other factors, the characteristics, contaminants, and any cleanup activities that have occurred at these sites.
- One thousand two hundred and thirty-four other sites classified by EPA's Superfund database as awaiting a National Priorities List decision are not likely to become eligible for the list because they were misclassified by the database or, according to EPA or state officials, they (1) have been cleaned up, (2) do not require cleanup, or (3) are currently undergoing a final cleanup. Appendix V lists, by state, the names and locations of these sites and indicates why they are not likely to become eligible for the National Priorities List.

Appendix VI lists the names and locations of the sites for which neither EPA nor states returned completed surveys. Appendix VII presents copies of our surveys of potentially eligible sites. Appendix VIII describes in detail our objectives, scope, and methodology. Appendix IX includes a list of EPA regional office and state agency officials we contacted for our review.

⁴We did not receive survey responses from either EPA or the state on 1 of the 33 sites.

Agency Comments

We provided copies of a draft of this report and the companion report, Hazardous Waste: Unaddressed Risks at Many Potential Superfund Sites (GAO/RCED-99-8, Nov. 30, 1998), to EPA for its review and comment. EPA provided written comments on the companion report and said that these comments also applied to the present report. EPA's letter is reproduced in appendix X. EPA said that it agreed with our basic findings and recommendations and believes that the reports will be useful to the Congress, the agency, states, and others interested in the future of the Superfund program. EPA also said that it has made National Priorities List placement decisions on many of the sites in its hazardous waste site inventory and made significant progress toward cleaning up listed sites. We have added this information to the report. EPA also provided technical and clarifying comments that we have incorporated in the report as appropriate.

To obtain information on the 3,036 sites that EPA identified as awaiting a National Priorities List decision and the 33 sites whose placement on the list has been opposed by governors, we developed and mailed two surveys for each nonfederal site and three surveys for each federal facility. We sent site surveys to site assessment officials in EPA's 10 regional offices. Since state officials may have more knowledge of some of the sites, we also sent surveys to the 50 states, the District of Columbia, Guam, Midway Island, the Northern Mariana Islands, Puerto Rico, and the Navajo Nation (collectively referred to as states in this report). In addition, if a federal agency is responsible for cleaning up a site, we also sent that agency a site-specific survey. In all, we surveyed 162 sites that are the responsibility of 14 federal agencies. We sent a follow-up survey to state officials on each potentially eligible site for which we did not receive a state response to our original mailing. We received one or more survey responses for 3,023 (99.6 percent) of the 3,036 sites identified by EPA as awaiting a National Priorities List decision and at least one survey for 32 of the 33 sites whose listing is opposed by governors. As mentioned, we discuss our methodology in greater detail in appendix VIII. We conducted our review between May 1997 and November 1998 in accordance with generally accepted government auditing standards.

As arranged with your office, unless you announce its contents earlier, we plan no further distribution of this report until 30 days after the date of this letter. At that time, we will send copies of this report to the appropriate congressional committees; the Administrator, EPA; and the

Director, Office of Management and Budget. We will also make copies available to others upon request.

Please contact me at (202) 512-6111 if you or your staff have any questions. Major contributors to this report are listed in appendix XI.

Sincerely yours,

A handwritten signature in black ink, appearing to read "P. F. Guerrero". The signature is stylized with a large, looped initial "P" and a long, sweeping tail.

Background

In 1980, the Congress passed the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), which established the Superfund program to clean up highly contaminated hazardous waste sites. The Environmental Protection Agency (EPA) administers the program, oversees cleanups performed by the parties responsible for contaminating the sites, and performs cleanups itself. State governments also have a role in the Superfund process. States may enter into contracts or cooperative agreements with EPA to carry out certain Superfund actions, including evaluating sites, cleaning them up, and overseeing the cleanups. In addition, most states have established their own hazardous waste programs that can clean up sites independently of the federal Superfund program.

CERCLA requires EPA to develop and maintain a list of hazardous sites, known as the National Priorities List (NPL), that the agency considers to present the most serious threats to human health and the environment. These sites represent EPA's highest priorities for cleanup nationwide. Although EPA may take emergency or partial cleanup actions at contaminated sites not on the NPL, EPA's regulations stipulate that only sites placed on the list are eligible for long-term "remedial actions" (cleanups) financed by EPA under the trust fund established by CERCLA.

EPA's regulations outline a formal process for assessing hazardous waste sites and placing them on the NPL. The agency may eliminate a site from further consideration for a number of reasons, including a finding that it does not pose a large enough threat to warrant listing or a state's preference to deal with the site under its own cleanup program. The process begins when EPA receives a report of a possible hazardous waste site from a state government, a private citizen, or a responsible federal agency. EPA enters reported sites into the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS), a database of site information. EPA or the state in which the site is located then conducts a preliminary assessment to decide whether the site poses a potential threat to human health and the environment. According to EPA officials, approximately half of the assessments are conducted by states through funding from EPA. If the preliminary assessment shows that contamination exists, EPA may conduct a site inspection and in some cases a follow-on examination called an expanded site inspection—a more detailed examination of possible contamination.

Using information from the preliminary assessment and site inspections, EPA applies its Hazard Ranking System to evaluate the site's threat to

human health and the environment. The system assigns each site a score ranging from 0 to 100 for use as a screening tool to determine whether the site should be considered for further action under Superfund. A site with a score of 28.5 or higher is considered for placement on the NPL. Once EPA determines that an eligible site warrants listing, the agency first proposes that the site be placed on the NPL and then, after receiving public comments, either lists it on the NPL or removes it from further consideration.

Under EPA's policy for coordinating with states in proposing sites for the NPL, an EPA region sends a written request to the governor of a state, with a copy to the commissioner of the state environmental agency, asking for the state's position on the listing of a site that the region is considering for the NPL. If the state does not agree that EPA should place the site on the NPL, but the region believes that it has sufficient reasons for listing the site, the region is to work closely with the state to try to resolve the issues. If the region cannot resolve these issues, EPA's Assistant Administrator for Solid Waste and Emergency Response will then decide whether to pursue NPL listing for the site. As of October 1997, EPA had received letters or verbal statements from state officials opposing the listing of 33 eligible sites (in 19 states) that EPA was considering proposing for the NPL.

According to EPA, as of November 1998, the Superfund program has investigated over 40,000 potential hazardous waste sites and made final decisions for almost 35,000 sites about whether or not to place them on the NPL. EPA also reported that it has removed waste or taken other interim cleanup actions at over 5,500 sites—most of which are not on the NPL—to address the most urgent risks and stabilize conditions to prevent further releases of contamination. EPA has completed cleanup construction at 585 of the more than 1,400 sites it has placed on the NPL.⁵ States have reported cleaning up thousands of sites under their own programs and authorities.

⁵Almost 200 of these 1,400 sites have been deleted from the NPL.

Information on 1,789 Sites That Are Potentially Eligible for the National Priorities List

The following tables present data on the conditions reported by EPA, states, and—for federally owned sites—responsible federal agency officials, at the 1,789 sites that are potentially eligible for the NPL and the opinions of these officials on the sites' risks; the need for more cleanup; and the likely outcome, or disposition, for the sites. The potentially eligible sites are presented in a separate table for each state. The information in these tables includes

- the site name and city location in each state, generally as included in EPA's CERCLIS database but edited as necessary to correct spelling errors or for clarity;⁶
- the "discovery date"—the year in which the site was entered into EPA's inventory;
- the principal contaminants present at each site, including
 - (1) metals—primarily heavy metals such as lead, mercury, or cadmium—which can cause brain and kidney damage and birth defects;
 - (2) volatile organic compounds (VOC)—carbon-based compounds, such as benzene, that easily become vapors or gases and can cause cancer, as well as damage to the blood, immune, and reproductive systems;
 - (3) semivolatile organic compounds (SVOC)—which are similar to VOCs and can result in human respiratory illnesses;
 - (4) pesticides—the most toxic of which can cause acute nervous system effects and skin irritations and may cause reproductive system effects and cancer;
 - (5) polychlorinated biphenyls (PCB)—which can cause skin irritations and other related conditions and may contribute to causing cancer, liver damage, and reproductive and developmental effects;
 - (6) dioxins—which are also suspected human carcinogens; and
 - (7) other unspecified contaminants.
- EPA, state, and responsible federal agency officials' assessments of whether
 - (1) groundwater and drinking water are currently contaminated (actual) or are likely to become contaminated in the future (potential) because of the site's contamination,
 - (2) residents or workers are present within a half mile of the site,
 - (3) plants or animals at or near the site are sick or dying, and
 - (4) EPA or the state has taken some interim cleanup actions, that is, actions which were not expected to fully clean up the site;
- EPA, state, and responsible federal agency officials' opinions on whether the site
 - (1) currently poses a high, average, low, or unknown level of risk to human health or the environment ("current risk") and
 - (2) is likely to pose a high, average, low, or unknown level of risk in the future ("potential risk");

⁶We did not attempt to verify the accuracy of each site's name or location as presented in EPA's CERCLIS database.

**Appendix II
Information on 1,789 Sites That Are
Potentially Eligible for the National
Priorities List**

- EPA, state, and responsible federal agency officials' opinions on whether the site requires additional cleanup; and
- EPA, state, and responsible federal agency officials' opinions on whether the final cleanup of the site is likely to be performed (1) by EPA under the Superfund program ("NPL cleanup"), (2) by the state under its cleanup programs ("state cleanup"), (3) by EPA under programs other than Superfund ("EPA cleanup"), or (4) under both EPA's and the state's programs ("EPA/state"). A response of "not needed" indicates that a respondent believed that the contamination at the site does not pose risks that are significant enough to require further cleanup actions. A response of "No cleanup" indicates that a respondent believed that the site requires further cleanup actions, but they will not be conducted because of limited resources, other priorities, or other unspecified factors. The following acronyms are used in the table to identify responding federal agencies: BLM (Bureau of Land Management), DOD (Department of Defense), DOE (Department of Energy), DOI (Department of the Interior), DOT (Department of Transportation), GSA (General Services Administration), USDA (U.S. Department of Agriculture), USAF (U.S. Air Force), USAR (U.S. Army), and USNV (U.S. Navy).

Throughout the tables, the term "unknown" indicates that (1) officials responded that it was too early to make a determination, (2) insufficient information was available for officials to answer the question, or (3) no answer was provided for a particular question. "No response" indicates that we did not receive a survey on the site from the identified respondent.

As reflected in the following tables, respondents did not always provide consistent information about sites. For example, EPA and state respondents disagreed about the need for future cleanup actions at some sites or about which government organization would take future actions at the sites. Also, answers from a single respondent sometimes seemed inconsistent, as when a respondent said that he did not know whether a site needed more cleanup but forecast future cleanup action by his agency. In the companion report to this report, Hazardous Waste: Unaddressed Risks at Many Potential Superfund Sites (GAO/RCED-98-8, Nov. 30, 1998), we recommended that EPA, in consultation with the applicable state, characterize and rank the risks associated with the potentially eligible sites and determine whether EPA or the state will be responsible for cleaning up individual sites. Inconsistencies in states' and EPA's views about the sites could be resolved in this process.

Information on 1,789 Sites That Are
Potentially Eligible for the National
Priorities List**

Site name	Location in Connecticut	Discovery date	Principal contaminants	Contamination of		
				Groundwater	Drinking water	Residents/workers w/in 0.5 miles?
A.B.A. Tool & Dye	Manchester	1988	Metals, VOCs, SVOCs	Actual	Actual	Yes
Carlyle Johnson Machine Co.	Manchester	1981	VOCs	Actual	Actual	Yes
Gill, L. M., Welding	Manchester	1988	VOCs	Actual	Actual	Yes
Lydall, Inc.	Manchester	1988	VOCs, PCBs, Other	Actual	Actual	Yes
Manchester Sanitary Landfill	Manchester	1981	Metals, VOCs, Other	Actual	Potential	Yes
Morland Valve	Manchester	1988	VOCs	Actual	Actual	Yes
Ability Machine & Tool Co.	Manchester	1988	Metals, VOCs	Potential	Potential	Yes
Marlborough Dump	Marlborough	1991	Metals, SVOCs	Actual	Potential	Yes
Phillips Property	Meriden	1987	Metals, Pesticides, VOCs, SVOCs, PCBs	Actual	Actual	Yes
Rogers Manufacturing Co.	Middlefield	1985	Metals, SVOCs	Actual	Actual	Yes
Marino Property	Middletown	1992	Metals, VOCs, SVOCs, PCBs	Actual	Potential	Yes
Mesco, Inc.	Milford	1988	Metals, VOCs, SVOCs	Potential	Potential	Yes
Nite Brite Sign Co., Inc.	Monroe	1981	VOCs	Actual	Potential	Yes
Kaladish Waste Disposal	Naugatuck	1981	Metals, Pesticides, SVOCs	Potential	Potential	No
Hurley Manufacturing Co.	New Hartford	1981	Metals, Pesticides, VOCs, SVOCs, PCBs	Actual	Potential	Yes
Amtrak General Maintenance Facility	New Haven	1989	Metals, VOCs, PCBs	Actual	Actual	Yes

Information on 1,789 Sites That Are
Potentially Eligible for the National
Priorities List**

Table II.21: Massachusetts: Information on Hazardous Waste Sites That Are Potentially Eligible for the National Priorities List

Site name	Location in Massachusetts	Discovery date	Principal contaminants	Contamination of		
				Groundwater	Drinking water	Residents/workers w/in 0.5 miles?
Airco Industrial	Acton	1991	Metals, VOCs, SVOCs	Actual	Potential	Yes
Acton Landfill	Acton	1984	Metals, VOCs, SVOCs	Actual	Potential	Yes
W.R. Grace Daramic Plant	Acton	1983	Metals, VOCs, SVOCs	Actual	Potential	Yes
Agway/Kress Property	Acton	1985	Pesticides	Actual	Potential	Yes
Rexnord Knife Division	Acton	1985	Metals, VOCs, SVOCs	Actual	Potential	Yes
Acushnet Landfill	Acushnet	1984	Metals, VOCs, SVOCs	Actual	Potential	Yes
Adams Landfill	Adams	1979	Metals, Pesticides, VOCs, SVOCs	Actual	Potential	Yes
Microfab, Inc.	Amesbury	1980	Metals, VOCs	Actual	Potential	Yes
SCA Services Landfill	Amesbury	1983	Metals, VOCs, SVOCs, PCBs	Actual	Potential	Yes
Brazonics	Amesbury	1990	Metals, VOCs	Actual	Potential	Unknown
Reichold Chemicals, Inc.	Andover	1979	Metals, VOCs, SVOCs	Actual	Potential	Yes
Andover Town Landfill	Andover	1979	Metals, Pesticides, VOCs, SVOCs	Actual	Potential	Yes
Colonial Lacquer & Chemical Co.	Ashland	1980	VOCs, SVOCs	Actual	Actual	Yes
Three C Electrical Co.	Ashland	1981	Metals, Pesticides, VOCs, SVOCs, PCBs	Potential	Potential	Yes

**Appendix II
Information on 1,789 Sites That Are
Potentially Eligible for the National
Priorities List**

Site name	Location in New Jersey	Discovery date	Principal contaminants	Contamination of		
				Groundwater	Drinking water	Residents/workers w/in 0.5 miles?
South Brunswick Asphalt	Manchester	1991	VOCs, SVOCs	Actual	Actual	Yes
Ocean Landfill Corp.	Manchester Township	1984	Metals, VOCs, SVOCs	Actual	Potential	Yes
Middlesex Industrial Center	Middlesex	1981	Metals, VOCs, SVOCs, PCBs	Potential	Potential	Yes
Chipman Chemical Co.	Middlesex	1979	Metals, Pesticides, VOCs	Actual	Potential	Yes
International Wire Products Corp.	Midland Park	1995	Metals, VOCs	Actual	Actual	Yes
Crown Castings, Inc.	Midland Park	1994	Metals, VOCs, SVOCs, PCBs	Actual	Unknown	Yes
Millville Coal Gas Site	Millville	1985	Metals, Pesticides, VOCs, SVOCs, Other	Actual	None identified	Yes
Monroe Township Municipal Well #4 & #5	Monroe Township	1984	Metals, VOCs	Actual	Actual	Unknown
VIP Cleaners	Morristown	1994	VOCs, SVOCs	Actual	Potential	Yes
Goldere Junkyard	Morristown	1991	Metals, VOCs, SVOCs, PCBs	Potential	None identified	Yes
B & V Tailoring and Cleaning	Mountain Lakes Borough	1993	Metals, Pesticides, VOCs, SVOCs, PCBs	Actual	Actual	Yes
Hamilton Hardware, Inc.	Neptune	1986	Metals, Pesticides, SVOCs	Potential	Potential	Unknown
Tidewater Baling	Newark	.	Metals, VOCs, PCBs	Actual	None identified	Yes
Fiore Demolition	Newark	1979	No response	Unknown	Unknown	Unknown
P&M Sanitation	North Arlington	1984	Metals, VOCs, SVOCs	None identified	None identified	Yes

Information on 1,789 Sites That Are
Potentially Eligible for the National
Priorities List**

Site name	Location in New York	Discovery date	Principal contaminants	Contamination of		
				Groundwater	Drinking water	Residents/workers w/in 0.5 miles?
Gratwick Riverside Park	North Tonawanda	1979	Metals, VOCs, Dioxin, Other	Actual	Actual	Unknown
Pas Irwin Dump	Oswego	1979	Metals, VOCs	Actual	Potential	Yes
IBM	Owego	1979	VOCs	Actual	Potential	Yes
Rotterdam Landfill (Active)	Pattersonville	1983	Metals	Potential	Potential	Yes
Piermont Landfill	Piermont	1980	Metals, Pesticides, VOCs, SVOCs, PCBs	Potential	Potential	Yes
Jarl Extrusions	Pittsford	1982	Metals, VOCs	Potential	None identified	Yes
100 Commercial Street	Plainville	1995	No response	Potential	Unknown	Yes
Weston Mills (George Stevens)	Portville	1980	Metals, VOCs	Actual	Actual	Yes
Johnny-on-the-Spot Cleaners	Poughkeepsie	1993	VOCs	Unknown	Unknown	Unknown
Ramapo Incinerator	Ramapo	1980	Metals, Pesticides, VOCs, Other	Actual	Actual	Unknown
Olin Chemical Corp.	Rochester	1980	Metals, VOCs	Actual	Potential	Yes
Sag Harbor Bridge Street	Sag Harbor	1988	Metals, Pesticides, VOCs, PCBs, Other	Actual	Potential	Yes
Sand Lake Landfill.	Sand Lake	1987	Metals, VOCs, PCBs	Potential	Potential	Yes
Islip Sayville Landfill	Sayville	1987	Metals	Potential	Potential	Yes
Cortland County Landfill	Solon	1980	Metals, VOCs, PCBs	Actual	Potential	Yes
Brookfield Avenue Landfill	Staten Island	1984	Metals, Pesticides, PCBs	Actual	Unknown	Yes

**Appendix II
Information on 1,789 Sites That Are
Potentially Eligible for the National
Priorities List**

Site name	Plants or animals sick/dying?	Some cleanup actions taken by		Opinions of EPA, state, and responsible federal agency			
		EPA?	State?	Risk to health or environment		More cleanup needed?	Most likely outcome
				Current	Potential		
Gratwick Riverside Park	Unknown	No	Yes	EPA: Unknown State: Unknown	EPA: Unknown State: Unknown	EPA: Yes State: Unknown	EPA: NPL State: State cleanup

Information on 232 Potentially Eligible Sites That Respondents Believed Might Be Placed on the National Priorities List

The following table presents data on the conditions reported by EPA, states, and—for federally owned sites⁷—responsible federal agency officials, at the 232 potentially eligible sites (included in app. I) that at least one respondent believed might be placed on the NPL in the future. Of the 232 sites, EPA officials identified 106 that they believed might be placed on the list, state officials identified another 100 sites, and both EPA and state officials agreed that another 26 sites might be potential NPL candidates. The table also includes the opinions of officials on the sites' risks; the need for more cleanup; and the likely outcome, or disposition, for the sites. These sites are presented in alphabetical order by state. The terms used in this table are the same as those used in tables II.1 through II.53 and are defined in appendix II.

⁷Eight of the 232 sites were federally owned or operated facilities.

Information on Sites Whose Placement on the National Priorities List Was Not Approved by State Governors

The following table presents data on the conditions reported by EPA, states, and—for federally owned sites—responsible federal agency officials, at 32 of the 33 sites whose placement on the NPL was opposed by state governors, as of October 15, 1997.⁸ The table also includes the opinions of these officials on the sites' risks and their cleanup status. The potentially eligible sites are presented in alphabetical order by state. Most of the terms used in this table are defined in appendix II. In addition, in the following table, entries under the heading "state response on cleanup status of site" indicate four possible assessments by the state: (1) the site has been cleaned up ("cleanup completed"), (2) actions expected to completely clean up the site are under way ("final cleanup under way"), (3) some cleanup activities have been conducted or are under way but respondents were not certain whether the activities will fully clean up the site ("some cleanup activities"), or (4) no cleanup actions were reported at the site ("no cleanup activities").

⁸We did not receive survey responses on one site in Utah from either EPA or state officials.

Names and Locations of 1,234 Sites That Are Unlikely to Become Eligible for the National Priorities List

The responses to our surveys from EPA, other federal agency, and state officials indicate that 1,234 of the 3,036 sites classified by the CERCLIS database as awaiting an NPL decision are unlikely to become eligible for the Superfund program for various reasons. First, CERCLIS inaccurately lists a significant portion of these sites (about 41 percent) as awaiting an NPL decision although they are unlikely to become eligible for listing. EPA regions reported that about 19 percent of the 3,036 sites are unlikely to become eligible because (1) their risks were judged to be less serious than is required for placement on the NPL or (2) EPA had already decided whether or not to proposed them for the list. We consider another 22 percent of the sites as unlikely to become eligible for the NPL because, according to responding officials, the sites either do not require any cleanup actions (183 sites), have already been cleaned up (182 sites); or are currently undergoing final cleanup (304 sites) under state programs.

The following tables present, by state, the 1,234 sites that are unlikely to become eligible for the NPL, their locations, and the reasons that they are considered not likely to become eligible. In the tables, the phrase “deferred to another program” indicates that EPA decided to address the site under an EPA program other than Superfund, such as the Resource Conservation and Recovery Act (RCRA) program, or referred the site to another agency for action. “No further action planned” indicates that EPA determined that it would take no further remedial action at the site (without concluding that some state or private cleanup might be appropriate). “No cleanup needed” indicates that both EPA and the state agreed that the site did not need further cleanup. In our surveys, respondents could select more than one response; therefore, there may be more than one explanation cited for why a site is unlikely to become eligible.

Names and Locations of 14 Sites for Which No Information Was Provided

We received no survey response from either EPA or the state for 13 of the 3,036 potentially eligible sites and 1 of the sites whose listing on the NPL was opposed by governors.⁹ The names and locations of these sites are included in table VI.1.

Table VI.1: Hazardous Waste Sites for Which No Information Was Provided

Site name	Location
Wallkill Waterwells	Wallkill, NY
Tennessee Gas Pipeline	Batesville, MS
Tennessee Gas Pipeline	Bay St. Louis, MS
Economy Products Co., Inc.	Omaha, NE
Aerrco	Arvada, CO
Great Western Inorganic	Golden, CO
El Paso Natural Gas	Montezuma Creek, UT
Leeds Silver Reclamation Site	Leeds, UT
Mingo Smelter	Salt Lake City, UT
Murray Smelter ^a	Murray City, UT
Ogden Iron Works	Ogden, UT
Sandy Sampling Works	Sandy, UT
Saturn Mining and Smelting Co.	Sandy, UT
Flagstaff Smelter	Sandy, UT

^aSite whose placement on the NPL was opposed by the state's governor.

⁹As we discuss in app. VIII, we did not receive fully completed state surveys for 491 of the 1,789 potentially eligible sites. Nearly three-quarters of these sites are located in California (125 sites) and Massachusetts (190 sites). In addition, we received only partial information from New York for 54 of its 56 potentially eligible sites. Furthermore, EPA regions I, II, and V answered certain questions in a standardized manner for all sites in the region rather than on a site-specific basis. Consequently, we could not characterize the conditions at sites in these states and regions with the same degree of accuracy as for other sites.

GAO Surveys on Potentially Eligible Sites

U.S. General Accounting Office

GAO Survey of NPL-Eligible Sites: U.S. EPA

Introduction

The U.S. General Accounting Office (GAO) examines issues for the U.S. Congress. We are conducting a review of contaminated sites that are considered "NPL-eligible." That is, these sites are found to be eligible for placement on the National Priorities List (NPL) after a site inspection by the U.S. Environmental Protection Agency (EPA). As part of our review, we are sending surveys to all EPA regions to request information on the individual sites located in their region. We are assessing the likelihood that sites will be placed on the NPL and the activities that are occurring to mitigate contamination at these sites.

This questionnaire asks about 1 of 3,000 NPL-eligible sites nationwide (as of October 8, 1997). In this questionnaire, we ask for information contained in your site inspection records. We are sending a similar survey to the appropriate state/territory/tribe to gain its perspective and to obtain additional information that they might have. Therefore, it is not necessary to consult with the state, territory, or tribe since they are also providing site information to us. Please have the most appropriate EPA staff fill out the questionnaire for the site indicated on the label.

Your response within 21 days of receiving this survey will help us avoid costly follow-ups. If the self-addressed business-reply envelope is missing, please return the questionnaire to the following address:

U.S. General Accounting Office
 Attn: Vincent Price
 441 G Street NW, Room 2T23
 Washington, DC 20548

If you have any questions, please call Vince Price at (202) 512-6529.

Thank you for your assistance.

Site name and location:

(label)

1. Please fill out the following in case we need to contact the person completing this survey.

Name: _____

Phone: (_____) _____

2. Please answer each question below to determine whether this site should be included in our survey. (Please circle answers.)

- a. Is site deferred to RCRA or the Nuclear Regulatory Commission? Yes No
- b. Is site's preliminary Hazardous Ranking System score below 28.5? Yes No
- c. Is site now designated as "no further remedial action planned" (NFRAP)? Yes No
- d. Is site now addressed as part of an existing NPL site? Yes No
- e. Is site proposed for the NPL? Yes No

3. Did you answer "yes" for any item above? (Check one.)

- 1. Yes--> Please stop here and return this survey to us.
- 2. No --> Please continue with survey.

Appendix VII
GAO Surveys on Potentially Eligible Sites

Please note: Because we don't know whose information is most current, we are also asking the state/territory/tribe for answers to Questions 4-8, 13-15, 17, and 19. So, if you do not have the information for those questions, there is no need to contact the state/territory/tribe for the answers.

Effects of site's contamination

4. How does contamination at this site affect groundwater? *(Check one.)*

1. Actual contamination
2. Potential contamination
3. No potential or actual contamination identified
4. Need more information to answer
5. Other *(Please explain.)*

5. How does contamination at this site affect **drinking water** (surface water or groundwater sources)? *(Check one.)*

1. Actual contamination
2. Potential contamination
3. No potential or actual contamination identified
4. Need more information to answer
5. Other *(Please explain.)*

Site conditions

6. Are there any residents or regular employees within 0.5 miles of the site? *(Check one.)*

1. Residents only
2. Employees only
3. Both residents and employees
4. Neither residents nor employees
5. *Need more information to answer*
6. Other *(Please explain.)*

**Appendix VII
GAO Surveys on Potentially Eligible Sites**

7. Do your region's records and/or your knowledge of the site indicate that this site's contamination contributes to any of the following? (Check one for each row.)

<i>(Check one for each row.)</i>	Yes (1)	No (2)	Uncertain (3)	Other <i>(Please explain.)</i> (4)
Drinking water				
a. Residents are advised not to use their wells.				
b. Residents are advised to use filtered water.				
c. Residents are advised to use bottled water.				
d. Water supply is temporarily changed.				
e. Water supply is permanently changed.				
Other uses of water				
f. Livestock drink contaminated water.				
g. Crops are irrigated with contaminated water.				
h. Fish could be unsafe to eat.				
i. Fish, plants, or animals are sick/dying.				
j. Recreation is stopped or restricted (e.g., fishing, swimming).				
k. Residents, workers, etc., use water that fails to meet water quality standards (e.g., for bathing, watering vegetable gardens, or landscaping).				

**Appendix VII
GAO Surveys on Potentially Eligible Sites**

<i>(Check one for each row.)</i>	Yes (1)	No (2)	Uncertain (3)	Other <i>(Please explain.)</i> (4)
Soil/air				
l. Residents/others should avoid exposure to contaminated dust or other particulates on some days.				
m. Residents are advised not to let children play/dig in their yards.				
n. Fences/barriers/signs are erected to keep residents or others out of contaminated areas.				
o. Obnoxious odors are present.				
Other conditions				
p. Trespassers, including children, may come into direct contact with contaminants.				
q. Workers or other legitimate visitors may come into direct contact with contaminants.				
r. Institutional restrictions are necessary because of the site's contamination (for example, a deed restriction limits the property to industrial use or a legal limit is placed on well depth).				
s. Residents/community have concerns about contamination or potential health effects caused by this site.				

Appendix VII
GAO Surveys on Potentially Eligible Sites

EPA activity at the site

8. Has EPA overseen or funded any of the following activities at this site? (Check all that apply.)

1. Removing waste from the site
2. Taking other interim actions to mitigate the site's contamination
3. Constructing final cleanup
4. Other (Please specify.)

5. None of the above
--> Skip to Question 10.

9. In what calendar year did the above site activities begin? (See previous question.) (Enter two digits.)

19_____

State/territorial/tribal activity at site

10. Has the state/territorial/tribal agency participated in evaluating and assessing this site (e.g., gathering information, hiring contractors)? (Check one.)

1. Yes
2. No
3. Don't know

11. Has EPA funded any assessment activities by the state/territory/tribe at this site? (Check one.)

1. Yes
2. No
3. Don't know

Site risk

12. Please rate the **current risk** to human health and the environment posed by this site. (Check one.)

1. Very high risk
2. High
3. Average
4. Low
5. Very low risk
6. Too early to tell/Need more information to answer
7. Other (Please explain.)

13. Please rate the **potential risk** to human health and the environment posed by this site if it is not cleaned up. (Check one.)

1. Very high risk
2. High
3. Average
4. Low
5. Very low risk
6. Too early to tell/Need more information to answer
7. Other (Please explain.)

Appendix VII
GAO Surveys on Potentially Eligible Sites

Status of site cleanup

14. As of September 30, 1997, will more cleanup be needed at this site to protect human health or the environment? *(Check one.)*

1. Definitely yes
2. Probably yes
3. Uncertain
4. Probably no
5. Definitely no
6. *Cannot say; depends on future spread of contamination*
7. Too early to tell/Need more information to answer
8. Other *(Please explain.)*

15. Is cleanup currently under way that will complete all remediation needed at this site to protect human health and the environment? *(Check one.)*

1. Yes
2. No
3. Cleanup is under way but it is too early to tell if more will be needed
4. Other *(Please explain.)*

PRP involvement at site

16. If you expect participation by potentially responsible parties (PRPs) in this site's cleanup, under what program(s) would this activity occur? *(Check all that apply.)*

1. *Do not expect PRP participation*
2. CERCLA after placement on NPL
3. CERCLA without placement on NPL
4. RCRA (including delegated to state)
5. State/territorial/tribal program
6. Too early to tell/Need more information to answer
7. Other *(Please specify.)*

17. Which one of the following *best* describes involvement of PRPs at this site? *(Check one.)*

1. No PRP likely (orphan site, etc.)
2. PRP(s) identified, but viability is uncertain
3. PRP(s) identified, but cooperation is uncertain
4. PRP(s) will participate in site's cleanup, but extent of participation uncertain
5. PRP(s) likely to clean up all or almost all of site's contamination
6. PRP(s) have already begun final cleanup and are expected to fund all or almost all of it
7. Too early to tell/Need more information to answer
8. Other *(Please specify.)*

Appendix VII
GAO Surveys on Potentially Eligible Sites

Opinions on site's placement on NPL

18. Considering EPA records and your professional opinion, will this site eventually be placed on the NPL? *(Check one.)*

1. Definitely yes
2. Probably yes
3. Uncertain
4. Probably no
5. Definitely no
6. *Contamination no longer qualifies site for placement on the NPL*
7. Too early to tell/Need more information to answer
8. Other *(Please explain.)*

19. In your professional opinion, which *one* of the following seems to be the *most likely* outcome for this site? *(Check only one.)*

1. Cleanup as an NPL site
2. No NPL listing, but EPA conducts or oversees cleanup (RCRA, removal, etc.)
3. No NPL listing, but the state/territory/tribe conducts or oversees cleanup (enforcement, voluntary cleanup, state-funded cleanup, etc.)
4. No cleanup conducted because not needed to protect human health and the environment
5. Further cleanup action is needed, but will not be conducted (due to limited resources, other priorities, etc.).
6. Too early to tell/Need more information to answer
7. Other *(Please describe.)*

**Appendix VII
GAO Surveys on Potentially Eligible Sites**

20. In your opinion, to what extent does each of the following statements currently explain why this site has not already been proposed for the NPL? (Check one for each row.)

<i>(Check one for each row.)</i>	Major factor (1)	Moderate factor (2)	Minor factor (3)	Not a factor (4)	<i>No basis to judge</i> (5)
a. We consider the state/territorial/tribal program to have the lead for the site.					
b. The state/territory/tribe told EPA that it plans to conduct or oversee cleanup.					
c. The state/territory/tribe is already conducting or overseeing further cleanup or assessment.					
d. State/territory/tribe is waiting for resources to proceed with cleanup/further assessment.					
e. We are waiting for the state/territory/tribe to provide necessary information.					
f. EPA's assessment resources are limited.					
g. EPA's resources for placing sites on the NPL are limited.					
h. EPA's cleanup resources are limited.					
i. The state/territory/tribe is opposing inclusion on the NPL.					
j. The local government/community is opposing inclusion on the NPL.					
k. We expect the site to be deferred to RCRA.					
l. Our removal program is working on the site.					
m. We are waiting for a federal agency (as PRP) to provide necessary information.					
n. We need to collect more information on the current risk at this site.					
o. Site is awaiting expanded site inspection (ESI).					
p. Site is undergoing ESI.					
q. Hazardous ranking system (HRS) package preparation is underway.					
r. Placing site on NPL is low priority because contamination does not <i>currently</i> threaten humans or the environment.					
s. We are waiting for a letter from the governor supporting placement on the NPL.					

**Appendix VII
GAO Surveys on Potentially Eligible Sites**

21. For each contaminant listed below, please indicate the media in which it is present at this site, according to the site inspection records. For the contaminants that are not present or not assessed, check box 1, "Contaminant not present/not assessed." (Check all that apply.)

	(1) <i>Contaminant not present/ not assessed</i>	(2) Air	(3) Soil	(4) Groundwater	(5) Surface water	(6) Other (incl. sediment, biota)
a. Metals						
b. Pesticides						
c. VOCs						
d. SVOCs						
e. PCBs						
f. Dioxin						
g. Other						

Abbreviations:

VOCs -- volatile organic compounds
 SVOCs -- semivolatile organic compounds
 PCBs -- polychlorinated biphenyls

Appendix VII
GAO Surveys on Potentially Eligible Sites

22. What is the approximate calendar year of the most recent information that you used to answer this survey? *(Check one.)*

1. 1990 or earlier
2. 1991
3. 1992
4. 1993
5. 1994
6. 1995
7. 1996
8. 1997
9. Other *(Please explain.)*

23. Please consider the information sources that you used to complete this survey and indicate the category below that most closely fits your situation. *(Check one.)*

1. Used site records only; have no other experience with this site
2. Used my own knowledge of this site and site records as needed
3. Other *(Please explain.)*

24. Thank you for your assistance with this survey. You may use the space below to add comments.

GAO Surveys on Potentially Eligible Sites

U.S. General Accounting Office

GAO Survey of NPL-Eligible Sites: States, Territories, and Tribes

Introduction

The U.S. General Accounting Office (GAO) is an agency that examines issues for the U.S. Congress. We are conducting a review of contaminated sites that are considered "NPL-eligible." That is, after a site inspection by the U.S. Environmental Protection Agency (EPA), these sites are found to be eligible for placement on the National Priorities List (NPL), also known as Superfund. As part of our review we are sending surveys to all states, territories, and Indian tribes to request information on the individual sites located in their jurisdictions. We are assessing the likelihood that sites will be placed on the NPL and the activities that are occurring to mitigate contamination at these sites.

This questionnaire asks about 1 of 3,000 NPL-eligible sites nationwide (as of October 8, 1997). Please make a reasonable effort to answer the questions. Because we are also sending a similar survey to U.S. EPA, we are especially interested in the information that they may not have on this site. If you cannot provide an answer to a question, check the box that indicates information is not available. It is not necessary to consult with U.S. EPA since they are also providing site information to us. Please have the most appropriate staff fill out each survey.

Your response within 21 days of receiving this survey will help us avoid costly follow-ups. If the self-addressed business-reply envelope is missing, please return the questionnaire to the following address:

U.S. General Accounting Office
Attn: Rosemary Torres Lerma
200 West Adams, Suite 700
Chicago, IL 60606

If you have any questions, please call Rosemary Torres Lerma at (312) 220-7644.

Thank you for your assistance.

Site name and location:

(label)

1. Please fill out the following in case we need to contact the person completing this survey.

Name: _____

State/Terr.: _____(2-letters) or Tribe: _____

Agency/Dept. _____

Phone: (_____) _____

Please note: Because we don't know whose information is most current, we are also asking U.S. EPA's regional office for answers to Questions 2-6, 10-12, 14, and 19. So, if you do not have the information for those questions, there is no need to contact U.S. EPA for the answers.

Effects of site's contamination

2. How does contamination at this site affect groundwater? (Check one.)

- 1. [] Actual contamination
- 2. [] Potential contamination
- 3. [] No potential or actual contamination identified
- 4. [] Need more information to answer
- 5. [] Other (Please explain.)

**Appendix VII
GAO Surveys on Potentially Eligible Sites**

3. How does contamination at this site affect *drinking water* (surface water or groundwater sources)? *(Check one.)*

- 1. Actual contamination
- 2. Potential contamination
- 3. No potential or actual contamination identified
- 4. Need more information to answer
- 5. Other *(Please explain.)*

Site conditions

4. Are there any residents or regular employees within 0.5 miles of the site? *(Check one.)*

- 1. Residents only
- 2. Employees only
- 3. Both residents and employees
- 4. Neither residents nor employees
- 5. Need more information to answer
- 6. Other *(Please explain.)*

5. Do your state's/territory's/tribe's records and/or your knowledge of the site indicate that this site's contamination contributes to any of the following? *(Check one for each row.)*

<i>(Check one for each row.)</i>	Yes (1)	No (2)	Uncertain (3)	Other <i>(Please explain.)</i> (4)
Drinking water				
a. Residents are advised not to use their wells.				
b. Residents are advised to use filtered water.				
c. Residents are advised to use bottled water.				
d. Water supply is temporarily changed.				
e. Water supply is permanently changed.				

**Appendix VII
GAO Surveys on Potentially Eligible Sites**

<i>(Check one for each row.)</i>	Yes (1)	No (2)	Uncertain (3)	Other <i>(Please explain.)</i> (4)
Other uses of water				
f. Livestock drink contaminated water.				
g. Crops are irrigated with contaminated water.				
h. Fish could be unsafe to eat.				
i. Fish, plants, or animals are sick/dying.				
j. Recreation is stopped or restricted (e.g., fishing, swimming).				
k. Residents, workers, etc., use water that fails to meet water quality standards (e.g., for bathing, watering vegetable gardens, or landscaping).				
Soil/air				
l. Residents/others should avoid exposure to contaminated dust or other particulates on some days.				
m. Residents are advised not to let children play/dig in their yards.				
n. Fences/barriers/signs are erected to keep residents or others out of contaminated areas.				
o. Obnoxious odors are present.				
Other conditions				
p. Trespassers, including children, may come into direct contact with contaminants.				
q. Workers or other legitimate visitors may come into direct contact with contaminants.				
r. Institutional restrictions are necessary because of the site's contamination (for example, a deed restriction limits the property to industrial use or a legal limit is placed on well depth).				
s. Residents/community have concerns about contamination or potential health effects from this site.				

Appendix VII
GAO Surveys on Potentially Eligible Sites

State/territorial/tribal activities

6. Has your state/territory/tribe overseen or funded any of the following activities at this site? (Check all that apply.)

- 1. No state/territorial/tribal program actions taken yet
--> Skip to Question 8.
- 2. Investigating/Assessing site
- 3. Removing waste from the site
- 4. Taking other interim actions to mitigate the site's contamination
- 5. Constructing final cleanup
- 6. Other (Please specify.)

7. Under what state/territorial/tribal program did the above activities (reported in Question 6) occur? (Check all that apply.)

- 1. Potentially responsible party (PRP) activity under an enforcement program
- 2. PRP activity under a voluntary cleanup program
- 3. PRP activity under another state/territorial/tribal program
- 4. Activity funded by state/territory/tribe
- 5. Activity funded by U.S. EPA
- 6. Other (Please specify.)

8. Do you expect to begin any *future* on-site cleanup activities (removal or remediation) at this site, either by the PRP or by your state/territory/tribe? (Check one.)

- 1. No
- 2. Yes--> a. In what calendar year? (Check one.)
 - 1. 1997
 - 2. 1998
 - 3. 1999
 - 4. 2000-2003
 - 5. 2004-2009
 - 6. 2010 or later
 - 7. Don't know
- 3. Too early to tell
- 4. Other (Please explain.)

Site risk

9. Please rate the *current risk* to human health and the environment posed by this site. (Check one.)

- 1. Very high risk
- 2. High
- 3. Average
- 4. Low
- 5. Very low risk
- 6. Too early to tell/Need more information to answer
- 7. Other (Please explain.)

Appendix VII
GAO Surveys on Potentially Eligible Sites

10. Please rate the *potential risk* to human health and the environment posed by this site if it is not cleaned up. (Check one.)

1. Very high risk
2. High
3. Average
4. Low
5. Very low risk
6. Too early to tell/Need more information to answer
7. Other (Please explain.)

Status of cleanup

11. As of September 30, 1997, will more cleanup be needed at this site to protect human health or the environment? (Check one.)

1. Definitely yes
2. Probably yes
3. Uncertain
4. Probably no
5. Definitely no
6. Cannot say; depends on future spread of contamination
7. Too early to tell/Need more information to answer
8. Other (Please explain.)

12. Is cleanup currently under way that will complete all remediation needed at this site to protect human health and the environment? (Check one.)

1. Yes
2. No
3. Cleanup is under way but it is too early to tell if more will be needed
4. Other (Please explain.)

PRP involvement

13. If you expect participation by PRP(s) in this site's cleanup, under what program(s) would this activity occur? (Check all that apply.)

1. Do not expect PRP participation
2. State/territorial/tribal voluntary cleanup
3. State/territorial/tribal enforcement (using an order, decree, or other legal agreement)
4. Other state/territorial/tribal program (solid waste, water resources, etc.)
5. U.S. EPA program
6. Too early to tell/Need more information to answer
7. Other (Please specify.)

Appendix VII
GAO Surveys on Potentially Eligible Sites

14. Which one of the following *best* describes involvement of PRPs at this site? (Check one.)

1. No PRP likely (orphan site, etc.)
-->(Skip to Question 16.)
2. PRP(s) identified, but viability is uncertain
3. PRP(s) identified, but cooperation is uncertain
4. PRP(s) will participate in site's cleanup, but extent of participation uncertain
5. PRP(s) likely to clean up all or almost all of site's contamination
6. PRP(s) have already begun final cleanup and are expected to fund all or almost all of it
7. Too early to tell/Need more information to answer
8. Other (Please specify.)

15. To what extent is the cooperation of this site's PRP(s) better or worse because of the possibility of the site's inclusion on the NPL? (Check one.)

1. No viable PRP known
2. Much better
3. Better
4. No impact
5. Worse
6. Much worse
7. Too early to tell/Need more information to answer
8. Other (Please explain.)

16. If you do not have a PRP who is likely to fund cleanup at this site, do you anticipate funding problems if your state/territory/tribe must pay for the cleanup? (Check one.)

1. Does not apply: PRP(s) likely to fund cleanup
2. Definitely yes
3. Probably yes
4. Uncertain
5. Probably no
6. Definitely no
7. Too early to tell/Need more information to answer
8. Other (Please explain.)

Opinions on site's placement on NPL

17. Considering your state's/territory's/tribe's environmental cleanup programs (legal authority, funding, and personnel), do you think this site will eventually be placed on the NPL? (Check one.)

1. Definitely yes
2. Probably yes
3. Uncertain
4. Probably no
5. Definitely no
6. Contamination no longer qualifies site for placement on the NPL
7. Too early to tell/Need more information to answer
8. Other (Please explain.)

Appendix VII
GAO Surveys on Potentially Eligible Sites

18. Which of the following best describes your state's/territory's/tribe's departmental position on NPL listing for this site? (*Check one.*)

- 1. Support
- 2. Neutral
- 3. Oppose
- 4. *Contamination no longer qualifies site for placement on the NPL*
- 5. Too early to tell/Need more information to answer
- 6. Other (*Please explain.*)

19. In your professional opinion, which *one* of the following seems to be the *most likely* outcome for this site? (*Check only one.*)

- 1. Cleanup as an NPL site
- 2. No NPL listing, but U.S. EPA conducts or oversees cleanup (RCRA, removal, etc.)
- 3. No NPL listing, but our state/territory/tribe conducts or oversees cleanup (enforcement, voluntary cleanup, state-funded cleanup, etc.)
- 4. No cleanup conducted because not needed to protect human health and the environment
- 5. Further cleanup action is needed, but will not be conducted (due to limited resources, other priorities, etc.).
- 6. Too early to tell/Need more information to answer
- 7. Other (*Please describe.*)

20. In what calendar year do you expect the construction of final cleanup remedy will be *completed*? (*Check one.*)

- 1. 1997
- 2. 1998
- 3. 1999
- 4. 2000-2003
- 5. 2004-2009
- 6. 2010 or later
- 7. *Cleanup remedy already completed*
- 8. *Cleanup remedy not needed to protect human health and the environment*
- 9. Too early to tell/Need more information to answer
- 10. Other (*Please explain.*)

Sources of information

21. Considering your answers to all survey questions, what is the most approximate calendar year of the most recent information that you provided for this site? *(Check one.)*

1. 1990 or earlier
2. 1991
3. 1992
4. 1993
5. 1994
6. 1995
7. 1996
8. 1997
9. Other *(Please explain.)*

22. Please consider the information sources that you used to complete this survey and indicate the category below that most closely fits your situation. *(Check one.)*

1. Used site records only; no other experience with this site
2. Used my own knowledge of this site and site records as needed
3. Other *(Please explain.)*

23. Thank you for your assistance with this survey. You may use the space below to add comments.

U.S. General Accounting Office

GAO Survey of NPL-Eligible Sites: Federal Agencies

Introduction

The U.S. General Accounting Office (GAO) is an agency that examines issues for the U.S. Congress. We are conducting a review of contaminated sites that are considered "NPL-eligible." That is, after a site inspection (SI), these sites are found to be eligible for placement on the Superfund National Priorities List (NPL). As part of our review we are sending surveys with such sites at their facilities. We are assessing the likelihood that these federal facilities will be placed on the NPL and seeking to identify the activities that are occurring to mitigate contamination at these sites.

This questionnaire asks about 1 of 156 federal, NPL-eligible facilities nationwide (as of October 8, 1997). We are interested in the sites, or areas, at your facility that are eligible for placement on the NPL. Because we are also sending a similar survey to U.S. EPA and the state in which your facility is located, we are especially interested in the information that only your agency can provide about this facility. If you cannot provide an answer to a question, check the box that indicates information is not available. It is not necessary to consult with U.S. EPA or the state to obtain the information. Please ask your most appropriate staff to fill out each survey.

Your response within 21 days of receiving this survey will help us avoid costly follow-ups. If the self-addressed business-reply envelope is missing, please return the questionnaire to the following address:

U.S. General Accounting Office
Attn: Vincent Price
441 G Street NW, Room 1826
Washington, DC 20548

If you have any questions, please call Vince Price at (202) 512-6529.

Thank you for your assistance.

Facility name and location:

(label)

1. Please fill out the following in case we need to contact the person completing this survey.

Name: _____

Agency: _____

Phone: (_____) _____

Before you fill out this survey, please note:

(1) By **this facility's eligible sites**, we mean the areas of this facility, or this site on public lands, that are considered eligible for placement on the NPL. These sites should be considered as a group.

(2) Because we do not know whose information is most current, U.S. EPA's regional office and the state are also providing answers to Questions 2-5, 8-11, and 14. So, there is no need to contact U.S. EPA or the state for those answers.

Effects of site contamination

2. How does contamination at this facility's eligible sites affect groundwater? ("**Eligible sites**" are the areas of your facility that are considered eligible for placement on the NPL.) (Check one.)

- 1. Actual contamination
- 2. Potential contamination
- 3. No potential or actual contamination identified
- 4. Need more information to answer
- 5. Other (Please explain.)

**Appendix VII
GAO Surveys on Potentially Eligible Sites**

3. How does contamination at this facility's eligible sites affect *drinking water* (surface water or groundwater sources)? *(Check one.)*

- 1. Actual contamination
- 2. Potential contamination
- 3. No potential or actual contamination identified
- 4. Need more information to answer
- 5. Other *(Please explain.)*

Site conditions

4. Are there any residents or regular employees within 0.5 miles of this facility's eligible sites? *(Check one.)*

- 1. Residents only
- 2. Employees only
- 3. Both residents and employees
- 4. Neither residents nor employees
- 5. Need more information to answer
- 6. Other *(Please explain.)*

5. Do your agency's records and/or your knowledge of your facility indicate that contamination at this facility's eligible sites contributes to any of the following? *(Check one for each row.)*

<i>(Check one for each row.)</i>	Yes (1)	No (2)	Uncertain (3)	Other <i>(Please explain.)</i> (4)
Drinking water				
a. Residents are advised not to use their wells.				
b. Residents are advised to use filtered water.				
c. Residents are advised to use bottled water.				
d. Water supply is temporarily changed.				
e. Water supply is permanently changed.				

**Appendix VII
GAO Surveys on Potentially Eligible Sites**

<i>(Check one for each row.)</i>	Yes (1)	No (2)	Uncertain (3)	Other <i>(Please explain.)</i> (4)
Other uses of water				
f. Livestock drink contaminated water.				
g. Crops are irrigated with contaminated water.				
h. Fish could be unsafe to eat.				
i. Fish, plants, or animals are sick/dying.				
j. Recreation is stopped or restricted (e.g., fishing, swimming).				
k. Residents, workers, etc., use water that fails to meet water quality standards (e.g., for bathing, watering vegetable gardens, or landscaping).				
Soil/air				
l. Residents/others should avoid exposure to contaminated dust or other particulates on some days.				
m. Residents are advised not to let children play/dig in their yards.				
n. Fences/barriers/signs are erected to keep residents or others out of contaminated areas.				
o. Obnoxious odors are present.				
Other conditions				
p. Trespassers, including children, may come into direct contact with contaminants.				
q. Workers or other legitimate visitors may come into direct contact with contaminants.				
r. Institutional restrictions are necessary because of the sites' contamination (for example, a deed restriction limits the property to industrial use or a legal limit is placed on well depth).				
s. Residents/community have concerns about contamination or potential health effects from this facility's eligible sites.				

Appendix VII
GAO Surveys on Potentially Eligible Sites

Federal agency activities

6. Has your agency performed any of the following activities at this facility's eligible sites? (Check all that apply.)

1. No agency actions taken yet
--> Skip to Question 8.
2. Investigating/Assessing eligible site
3. Removing waste from eligible site
4. Taking other interim actions to mitigate an eligible site's contamination
5. Constructing final cleanup
6. Other (Please specify.)

7. Does your agency expect to begin any *future* on-site cleanup activities (removal or remediation) at this facility's eligible sites? (Check one.)

1. No
2. Yes--> a. In what calendar year? (Check one.)
 1. 1997
 2. 1998
 3. 1999
 4. 2000-2003
 5. 2004-2009
 6. 2010 or later
 7. Don't know
3. Too early to tell
4. Other (Please explain.)

Site risks

8. Please rate the *current risk* to human health and the environment posed by this facility's eligible sites. (Check one.)

1. Very high risk
2. High
3. Average
4. Low
5. Very low risk
6. Too early to tell/Need more information to answer
7. Other (Please explain.)

9. Please rate the *potential risk* to human health and the environment posed by this facility's eligible sites if they are not cleaned up. (Check one.)

1. Very high risk
2. High
3. Average
4. Low
5. Very low risk
6. Too early to tell/Need more information to answer
7. Other (Please explain.)

Appendix VII
GAO Surveys on Potentially Eligible Sites

Status of cleanup

10. As of September 30, 1997, will more cleanup be needed at this facility's eligible sites to protect human health or the environment? *(Check one.)*

- 1. Definitely yes
- 2. Probably yes
- 3. Uncertain
- 4. Probably no
- 5. Definitely no
- 6. *Cannot say; depends on future spread of contamination*
- 7. Too early to tell/Need more information to answer
- 8. Other *(Please explain.)*

11. Is cleanup currently under way that will complete all remediation needed at this facility's eligible sites to protect human health and the environment? *(Check one.)*

- 1. Yes
- 2. No
- 3. Cleanup is under way but it is too early to tell if more will be needed
- 4. Other *(Please explain.)*

12. Do you anticipate funding problems for the cleanup? *(Check one.)*

- 1. Definitely yes
- 2. Probably yes
- 3. Uncertain
- 4. Probably no
- 5. Definitely no
- 6. Too early to tell/Need more information to answer
- 7. Other *(Please explain.)*

Opinions on facility placement on NPL

13. In your professional opinion, do you think this facility will eventually be placed on the NPL? *(Check one.)*

- 1. Definitely yes
- 2. Probably yes
- 3. Uncertain
- 4. Probably no
- 5. Definitely no

Appendix VII
GAO Surveys on Potentially Eligible Sites

14. In your professional opinion, which *one* of the following seems to be the *most likely* outcome for this facility's eligible sites? (*Check only one.*)

1. Cleanup as an NPL site
2. No NPL listing, but our agency conducts cleanup under both EPA and state oversight
3. No NPL listing, but our agency conducts cleanup under EPA oversight
4. No NPL listing, but our agency conducts cleanup under state oversight
5. No cleanup conducted because not needed to protect human health and the environment
6. Further cleanup action is needed, but will not be conducted (due to limited resources, other priorities, etc.)
7. Too early to tell/Need more information to answer
8. Other (*Please describe.*)

15. In what calendar year do you expect the construction of the final cleanup remedy will be *completed*? (*Check one.*)

1. 1997
2. 1998
3. 1999
4. 2000-2003
5. 2004-2009
6. 2010 or later
7. *Cleanup remedy already completed*
8. Cleanup remedy not needed to protect human health and the environment
9. Too early to tell/Need more information to answer
10. Other (*Please explain.*)

Appendix VII
GAO Surveys on Potentially Eligible Sites

Sources of information

16. Considering your answers to all survey questions, what is the approximate calendar year of the most recent information that you provided for any of this facility's eligible sites? *(Check one.)*

1. 1990 or earlier
2. 1991
3. 1992
4. 1993
5. 1994
6. 1995
7. 1996
8. 1997
9. Other *(Please explain.)*

17. Please consider the information sources that you used to complete this survey and indicate the category below that most closely fits your situation. *(Check one.)*

1. Used site records only; no other experience with this facility's eligible sites
2. Used my own knowledge of this facility's eligible sites and site records as needed
3. Other *(Please explain.)*

18. Thank you for your assistance with this survey. You may use the space below to add comments.

Objectives, Scope, and Methodology

Our objectives in this review were to obtain site-by-site information on (1) the number and characteristics of sites classified as awaiting an NPL decision as of October 1997 that continue to be potentially eligible for the list; (2) the number and characteristics of sites whose placement on the NPL was opposed by state governors as of the same date; and (3) the number of sites classified as awaiting an NPL decision as of October 1997 that are not likely to become eligible for the list and the reasons why they are not. To achieve these objectives, we developed and mailed several surveys to officials in EPA regions, the states, and other federal agencies with responsibility for hazardous waste sites. The surveys appear in appendix VII.

EPA's CERCLIS database indicated that as of October 8, 1997, 3,036 sites were potentially eligible for the NPL on the basis of a combination of criteria. These criteria include a preliminary Hazard Ranking System score of 28.5 or above, the completion of a site inspection, and a status that neither eliminates the site from NPL consideration nor includes a proposal to list it. Because our objectives require data for each site, we did not sample the sites but included all 3,036 in our survey. The database also indicated that as of October 15, 1997, state governors did not concur in the placement on the NPL of 33 sites in 19 states. These sites include 28 nonfederal sites and 5 federal sites.

To obtain information on all 3,036 sites that EPA identified as awaiting an NPL decision, we developed three mail surveys. We sent the first survey to officials in EPA's 10 regional offices responsible for evaluating the sites and making decisions about listing. Because state officials may have closer contact with some of the sites, we sent the second survey to officials in the 50 states, the District of Columbia, Guam, Midway Island, the Northern Mariana Islands, Puerto Rico, and the Navajo Nation (collectively referred to as states in this report). In addition, we sent a third survey to federal agencies that are responsible for cleaning up the 157 federally owned and/or operated sites that were classified as awaiting an NPL decision. We sent surveys on the 157 sites to 14 federal agencies, including the departments of Agriculture, the Air Force, the Army, Defense, Energy, the Interior, the Navy, and Transportation; the Bureau of Land Management; the General Services Administration; the National Aeronautics and Space Administration; the U.S. Army Corps of Engineers; the U.S. Coast Guard; and the U.S. Forest Service. The three surveys asked respondents for detailed information on the conditions at each site, including the site's current and potential risks, and their opinions on the involvement of potentially responsible parties and the likely outcome for the site,

including any potential for NPL listing. For the 33 sites that EPA considered proposing for the NPL but whose listing was opposed by state governors, we developed three more surveys. These surveys asked similar questions to those in the other surveys but omitted questions on the sites' potential NPL status. We mailed these surveys to the appropriate officials in eight EPA regions, 19 states, and the departments of the Air Force and the Army.

We mailed all of our surveys in November and December 1997 and received the final responses in September 1998. We received one or more survey responses for 3,023 (99.6 percent) of the 3,036 sites identified by EPA as awaiting an NPL decision. On the basis of these responses, we identified 1,234 sites that are unlikely to become eligible for the NPL or no longer awaiting an NPL decision. Because we received no survey responses for 13 sites, we could not determine whether they are still potentially eligible for the NPL; therefore, we excluded these sites from our analyses. The remaining 1,789 sites are analyzed in this report as potentially eligible sites. Of these sites, 1,739 are nonfederal sites, and 50 are federally owned or operated sites.

We obtained survey information from both EPA and the states on 1,319 (76 percent) of the 1,739 potentially eligible nonfederal sites. This information includes 1,326 state responses (76 percent) and 1,732 responses from EPA (99.6 percent). Similarly, we obtained information from at least two of the three possible respondents—EPA, other federal agencies, and states—for 45 (90 percent) of the 50 potentially eligible federal sites. Responsible federal agencies provided information for 39 (78 percent) of the 50 potentially eligible federal sites, states provided responses for 26 (52 percent) of the federal sites, and EPA regions provided responses for 49 (98 percent) of the federal sites. Similarly, we obtained data from at least one respondent for 32 of the 33 sites whose listing on the NPL was opposed by state governors, specifically, responses from both EPA and the state for 22 sites (67 percent), EPA alone for 8 sites (24 percent), and the state alone for 2 sites (6 percent). We received a survey response from neither EPA nor the state on one remaining site. For the 5 of the 33 sites that are federal facilities, we received responses from all three parties for 3 sites (60 percent), from the state and responsible federal agency for 1 site (20 percent), and from EPA and the state for 1 site (20 percent). In total, we received surveys from EPA regions for 30 (91 percent) of the 33 sites, from states for 24 (73 percent) of these sites, and from responsible federal agencies for 4 (80 percent) of the 5 sites.

Because 19 states—including California, Massachusetts, and New York, which account for 19 percent of the 3,036 sites—did not fully respond to our initial mailing of the survey of the potentially eligible sites, in July 1998 we sent a second survey to these states. In order to minimize the effort required for states to complete this follow-up survey, we eliminated sites that EPA and other federal agencies had identified as no longer eligible for the NPL. In addition, the follow-up survey included as a starting point the information on each site that EPA regions had provided in their responses. We asked state officials to confirm or correct the information provided to us by EPA regions. In the follow-up survey, we also repeated the original questions asked of the states but not of EPA regions. The original state survey was included as a reference source. This follow-up effort resulted in our receiving an additional 85 completed surveys from some states. However, despite numerous contacts, we received no survey responses from California, Massachusetts, Nebraska, and the District of Columbia. Rather than responding to our survey, California officials suggested that we obtain their responses to a brief 1-page survey on potentially eligible sites conducted by the Association of State and Territorial Solid Waste Management Officials. Similarly, Massachusetts officials provided us copies of their responses to the Association’s survey. However, because of differences in the format, specificity of answers, comparability of answers, and topics covered, we could not incorporate the results of that survey into our analyses.

New York State officials generally responded to only three survey questions for the sites in that state that EPA classified as awaiting an NPL decision. The three questions asked for information about whether sites would be listed on the NPL and what activities the state has taken to cleanup the sites. The responses to these questions were incorporated into our analyses.

While our overall survey response rate was high, our data for some states are incomplete. We did not receive state surveys for 491 of the 1,789 potentially eligible sites. Nearly three-quarters of these sites are located in California (125 sites) and Massachusetts (190 sites). In addition, we received only partial information from New York for 54 of its 56 potentially eligible sites. Table VIII.1 shows the 16 states that either did not respond to our survey or responded only in part, and the number and percentage of potentially eligible sites in each state for which we did not receive fully completed surveys.

**Appendix VIII
Objectives, Scope, and Methodology**

Table VIII.1: Number and Percentage of Sites for Which Fully Completed Surveys Were Not Received, by State

State	Number of potentially eligible sites in state	Number	Percent
Alabama	15	2	13%
Alaska	14	6	43%
California	125	125	100%
District of Columbia	1	1	100%
Florida	195	5	3%
Georgia	35	1	3%
Hawaii	5	1	20%
Idaho	11	4	36%
Maryland	12	5	42%
Massachusetts	190	190	100%
Navajo Nation	14	9	64%
Nebraska	19	19	100%
New Jersey	112	66	59%
New York ^a	56	54	96%
Pennsylvania	38	1	3%
Washington	17	2	12%
Total, 16 states	859	491	57%
Total, all states	1,789	491	27%

^aNew York provided answers to three questions for 54 sites and returned completed surveys for 2 additional sites.

We also did not receive completed surveys from all states with sites that EPA considered proposing for the NPL but whose listing was opposed by the states' governors. We received no survey responses for these sites from California (three sites), Mississippi (two sites), and Utah (three sites).

EPA regions I and V notified us that because of time and resource constraints, they had taken a generic approach to answering certain survey questions: that is, they answered certain questions in a standardized manner for all sites in the region rather than on a site-specific basis. Questions addressed in this manner included those relating to the likely placement of sites on the NPL and the risks posed by the sites, among other questions. For example, for most sites, Region I answered our questions about the degree of human health or environmental risks posed by each site by responding that it is "too early to tell/more information is needed to answer" because, according to Region I officials, "risk

assessments are not conducted for most CERCLIS sites, and thus the current risks posed by these sites are difficult to determine.” EPA Region II responded to key survey questions in a similar manner. Consequently, because neither EPA regions I, II, and V, nor three states in those regions —Massachusetts (190 sites), New Jersey (66 sites), and New York (54 sites)—provided complete survey information, we could not characterize the conditions at these sites with the same degree of accuracy as for other sites. For example, these three states account for 54 percent of the sites for which we could not obtain an official’s estimate of the risks to human health and the environment.

We conducted pretests of our surveys with officials in six states, at two federal agencies, and in five EPA regional offices. Each pretest consisted of a visit with a state or federal official.¹⁰ We attempted to vary the types of sites for which we conducted pretests and the familiarity of the respondents with the sites. In some cases, the respondent used only site records to answer our survey. In other cases, the respondent knew most of the answers without consulting records. The pretest attempted to simulate the actual survey experience by asking the official to fill out the survey while GAO staff observed and took notes. Then the official was interviewed about the survey items to ensure that (1) the questions were readable and clear, (2) terms were precise, (3) the survey was not a burden that would result in a lack of cooperation, and (4) the survey appeared independent and unbiased. We made appropriate changes to the final survey on the basis of our pretesting. In addition to our pretesting, we obtained views on our surveys from managers in EPA’s Office of Emergency and Remedial Response in Washington, D.C., which oversees the Superfund program. We incorporated comments from these reviews as appropriate.

In analyzing survey responses, we reviewed comments written by respondents on the surveys, including marginal comments, comments at the end of the survey, and comments when the respondents provided explanations after checking “other.” If a respondent’s comment explaining the selection of “other” could reasonably be interpreted as another of the answer choices provided for the question, we revised the response as appropriate. In some cases, respondents’ comments indicated a misunderstanding of our questions or answer choices. In these cases, where possible, we revised the response to reflect the appropriate answer. In other cases, respondents checked more than one answer; we then selected, where possible, what we considered to be the appropriate answer, on the basis of other responses in the survey or our own

¹⁰For Puerto Rico and the Navajo Nation, we contacted officials by telephone to conduct pretests.

judgment. The procedures used in this editing process were documented in an internal 17-page document provided to all of the GAO reviewers of the survey responses. At least two reviewers analyzed each survey response, and the reviewers coordinated their efforts to ensure that all reviewers followed the established procedures. Both the original answers and the answers revised by reviewers were recorded.

In our surveys of officials of EPA regions, states, and federal agencies, some of the questions we asked about particular sites were identical. We combined the responses to these questions where possible in this report. If opinions differed, we used a set of criteria to combine answers. Namely, we chose the answer that seemed to reflect the most knowledge of the site. For site conditions, we assumed that any affirmative answer was the more knowledgeable. For example, if one respondent said that a site has groundwater contamination and the other respondent was unable to comment on that site's contamination, we recorded the site as having groundwater contamination. We also sought to avoid understatement of the risks posed by a site. Therefore, if respondents disagreed on the level of a site's risks, we selected the response indicating the more severe threat. For example, sites scored by any respondent as high-risk were recorded as high-risk sites. Furthermore, if a respondent indicated in any survey response that a site might be included on the NPL, we recorded the site as a possible candidate for the NPL. Finally, when opinions about the most likely outcome for a site were in conflict—for example, if the state thought that EPA would clean up a site but EPA thought the state would conduct the cleanup—we recorded the most likely outcome as unknown.

In addition to our mail surveys, we also conducted a telephone survey with officials in 44 states to determine general information on their hazardous waste management programs and sites within their states. State officials in Idaho, New York, Missouri, Utah, Virginia, and Wyoming declined to participate in our telephone survey.

We conducted our review between May 1997 and November 1998 in accordance with generally accepted government auditing standards.

OFFICE OF
SOLID WASTE AND EMERGENCY RESPONSE

Mr. Peter F. Guerrero, Director
Environmental Protection Issues
United States General Accounting Office
Washington, D.C. 20548

Dear Mr. Guerrero:

Thank you for providing the opportunity to comment on the Draft Report, *Hazardous Waste: Unaddressed Risks at Many Potential Superfund Sites*. We appreciate the scope of this undertaking and the considerable effort to include survey results from others, e.g., States and other Federal agencies.

We agree with the basic findings and recommendations that 1) a substantial number of potential Superfund sites require attention and 2) EPA and the States should develop a joint strategy for addressing these sites. However, we also believe it would be worthwhile to include the Superfund program's accomplishments. EPA has investigated over 40,000 potential hazardous waste sites and made final decisions almost 35,000 sites. We have performed removal actions at over 5,500 sites to address the most urgent risks and stabilize conditions to prevent further releases; more than 1,400 sites have been placed on the National Priorities List (NPL). In addition, we have completed cleanup construction at 585 NPL sites. Cleanup studies and decisions have been completed at most NPL sites that are awaiting funding at this time. Moreover, the States have cleaned up thousands of sites under their own programs and authorities.

I believe this report will be useful to Congress, the Agency, States, and others interested in the future of the Superfund program.

Sincerely,

A handwritten signature in black ink that reads "Stephen D. Luftig".

Stephen D. Luftig, Director
Office of Emergency and Remedial Response

Ordering Information

The first copy of each GAO report and testimony is free. Additional copies are \$2 each. Orders should be sent to the following address, accompanied by a check or money order made out to the Superintendent of Documents, when necessary. VISA and MasterCard credit cards are accepted, also. Orders for 100 or more copies to be mailed to a single address are discounted 25 percent.

Orders by mail:

U.S. General Accounting Office
P.O. Box 37050
Washington, DC 20013

or visit:

Room 1100
700 4th St. NW (corner of 4th and G Sts. NW)
U.S. General Accounting Office
Washington, DC

Orders may also be placed by calling (202) 512-6000 or by using fax number (202) 512-6061, or TDD (202) 512-2537.

Each day, GAO issues a list of newly available reports and testimony. To receive facsimile copies of the daily list or any list from the past 30 days, please call (202) 512-6000 using a touchtone phone. A recorded menu will provide information on how to obtain these lists.

For information on how to access GAO reports on the INTERNET, send an e-mail message with "info" in the body to:
